

WORK EXPERIENCE 2012

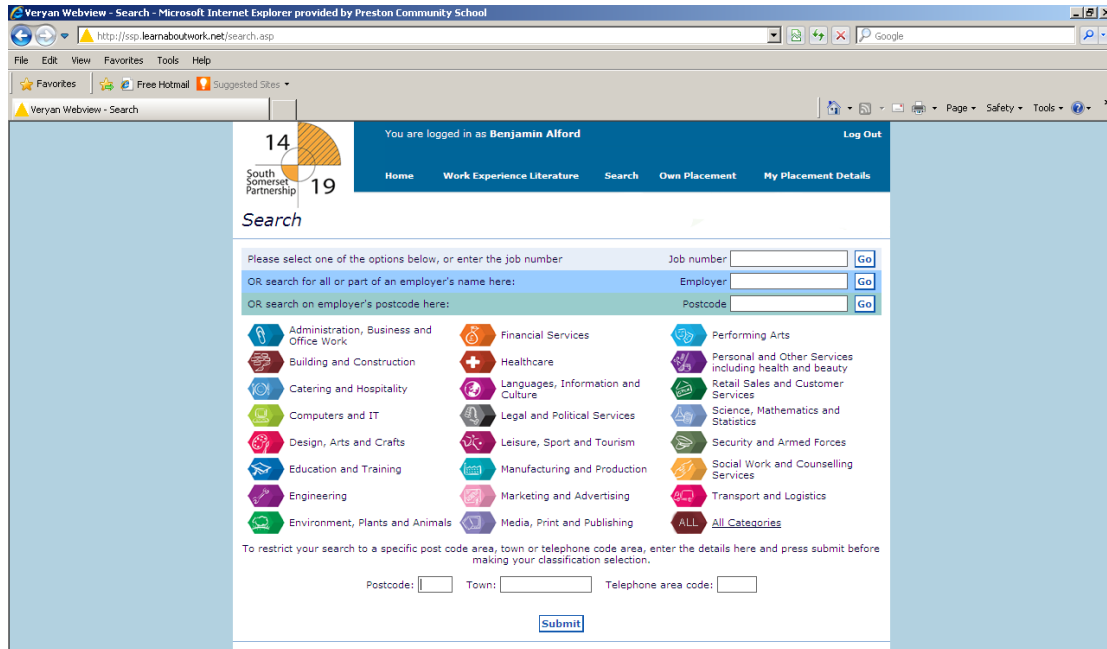

A Guide to using Veryan Webview to find a work experience placement.

The database can be found here, you will need a PIN to access the database.

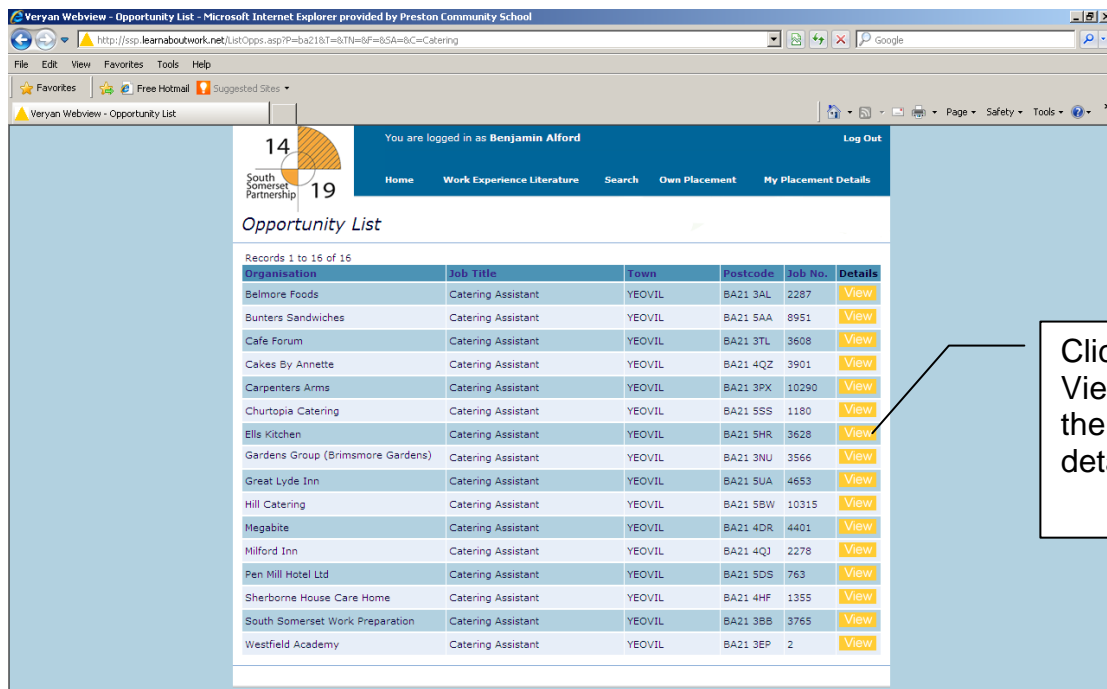

<http://ssp.learnaboutwork.net/index.asp>

This list allows you to click on different sectors, to search by postcode, town or even for specific employers. If you type a postcode, town or telephone area code in you must click submit before you click on a sector as this refreshes the database.

In this example I have searched for Catering Jobs in Postcode BA21.

Click on View to get the contact details

This screen gives an outline of the role, and the contact details for the placement. Students then need to contact the placement they are interested in.

The screenshot shows a web browser window with the address bar displaying <http://ssp.learnaboutwork.net/OppDetails.asp?JobNumber=763>. The page title is "Veryan Webview - Job Description". The user is logged in as "benjamin afford". The page features a navigation menu with links for Home, Work Experience Literature, Search, Own Placement, and My Placement Details. The main content area is titled "Job Description" and includes a "Return to job list | New search" link. The job details are as follows:
